

PERFORMANCE ENHANCEMENTS

Sustainable Solutions is Our Ongoing Commitment

Concept Part Solutions is dedicated to extending the lifetime of your maturing semiconductor manufacturing equipment. As your toolsets age and new processes emerge, we pursue every opportunity through our Continuous Improvement Program (CIP) to offer important enhancements that increase the reliability, productivity, and performance of your install base.

Sabre xT

XSEL Lift Assembly

OEM equipment obsolescence solution offerings oftentimes are not available for direct implementation onto legacy configured platforms. In many instances, end users must invest in costly prerequisites to allow for replacement assemblies to be compatible for seamless operation. CPS engineering is dedicated to finding ways of cost effectively implementing these obsolescence solutions without the need for many of the costly prerequisite recommendations from the OEM. To that end, CPS is pleased to announce its program for direct implementation of the XSEL Lift assembly for the Sabre xT platforms.

The SELG lift assembly has been obsolete on the Sabre Electrofill System for several years. The OEM recommendation that any system requiring the replacement XSEL Lift assembly would also require a full control system upgrade to the NeXT configuration is a costly solution path. It could also create additional prerequisites that at times condemned the system to be unupgradable. CPS engineering has completed testing and developed a methodology that allows for upgrading to the XSEL Lift with minimal prerequisite requirements for many of its legacy Sabre xT customers.

Benefits

- Direct replacement path for the obsolete SELG lift assembly

Get More Information on System Performance Enhancements

To find out how to improve the performance and productivity of your CPS supported systems, call your local CPS Sales and Service Office for complete ordering information, or visit www.conceptpartsolutions.com.

System Prerequisites:

A system audit will be required to determine if any additional items are needed to accommodate this upgrade.

Ordering Information:

Contact your local CPS representative for guidance before ordering this upgrade kit.

Some Upgrades may require an audit of your System; Contact your local CPS Representative to verify the Upgrade Kit before ordering.
